## EDUCATION

---

**INTERNSHIP** Inmakes Infotech Courses : Python Full Stack

**B.TECH ( 2019 - 2023 )**

Toc H Institute of Science and Technology

## PROJECTS

---

**Gemini Custom AI** | *html, CSS ,Javascript,python/django*

Ai powered by Gemini model-1.5,the project integrates the Gen ai with django as backend and frontend using Javascript.This is a basic AI model trained on huge dataset but lacks chat sessions and continuity

Source code:[Chatapp -](#)    [live link:https://gemini-custom-chat.vercel.app/](https://gemini-custom-chat.vercel.app/)

**Reflex Chat App**|*Reflex Framework,Python*

Developed a chat app using the Reflex framework with full chat continuity, entirely in Python without any use of CSS, HTML, or JavaScript .The app is powered by google Generative-AI and the previous chat continuity issue is resolved in this model where the bot keeps the record of the current state .Ensuring a progressive and seamless chat for user
